

## Handover pack index

AI Failures Museum | Team Project COM2020 | Group Java The Hutt

### Purpose

This index lists the coursework handover materials for the final AI Failures Museum submission. Together they describe data handling, how to run and deploy the system, and how to operate and troubleshoot it in practice.

### Contents of 2\_handover\_pack

1. handover\_index.pdf (this document) - Navigation and summary of the handover pack.
2. Data\_mangement.pdf - Data management: what data the application stores, retention, backups, and responsibilities (see also docs in the repository root).
3. deployment\_and\_operations.pdf - Environment requirements, local startup, production-oriented deployment checklist, and day-to-day operations.
4. maintenance\_and\_troubleshooting.pdf - Routine maintenance, common failures, and where to look for support information in the repo.

### Related submission folders (GroupJava\_The\_Hutt\_CW2)

- 0\_admin - Team and submission metadata.
- 1\_report - Final report (cw2\_final\_report.pdf).
- 3\_process - Meeting minutes, risk register, scrum board export.
- 4\_ethics\_and\_licensing - Ethics, licence decision, data/software inventory.
- 5\_technical - Security checklist and testing evidence.
- 6\_presentation - Final slides.

Source code and README live in the repository root (Django app under backend/).
